Shinju & You – Building *YOUR* future together!

[Strike Team Briefing]

Generating Experience:

Players may progress and upgrade their army at the end of each chapter by spending experience (XP). Experience is generated through the objective points earned in each game, with *1 objective point, generating 1 experience point*.

This gives you a maximum, base experience of 10 points per chapter.

There are *bonus experience points* available in each chapter as follows:

+1 Experience Point for winning your game

OR

+3 Experience Points if both players in your team won

So, over the six chapters, there will be *a total of 78 experience points available.*

Spending Experience:

Experience points maybe spent on several different buffs and options. You spend Experience at the end of a Chapter, before the next Chapter mission or pairings are announced. They should be tracked on your personal Campaign Sheet.

Once Experience Points are spent, they are done. You may not retract and reallocate them again.

Developing Together:

One member of a Strike Team may donate up to 50% of their experience points earned in the last chapter to their teammate. This transfer is permanent. This may only be done once per chapter, per strike team.

Progression:

There are three core types of progression in this campaign:

- Command Experience – buffs, bonuses or modifiers which will apply to your army as a whole
- Commander Promotion – As the campaign progresses, your Commander will gain experience and connections which may offer bonuses to your army
- Spec-Ops – Developing a single, Special Operations Trooper to become a death-dealing powerhouse
- Consumables – Single use buffs or equipment which lasts a single Chapter

Command Experience:

This represents your force developing in combat, gaining new equipment, upgrades from HQ, and incorporating technology that they find in the field.

	Mobile Reserve	Logistical Support	Military Intelligence	Tech Support	Recon Intel	The Dice Gods
Level 1: 2 XP cost	+5 Army Points	+1 to all disposable weapons	+3 to the Initiative Roll +3 Promotion	All REMs gain +3 BTS	Draw 3 Classifieds, keep 1	Reroll 1 die per game
Level 2: 5 XP cost	+10 Army Points	+1 to all disposable & +1 SWC	Does the enemy have AD? +3 Promotion	All HI may reroll reset rolls	Auto pass one objective roll	+3 to success value on one roll per game chapter
Level 3: 9 XP cost	+10 Army Points	+1 CR turret placed in friendly DZ	Does the enemy have Hidden Deployment?	All Hackers gain +3 BTS	Enemy reveals Classifieds	May auto crit one roll per game chapter
Level 4: 14 XP cost	+15 Army Points	+1 Baggage Bot for Free	Copy enemy army list +3 Promotion	FOs may FO in ZoC without LoS	May trigger sensor 2x after deployment	May auto crit one roll per game chapter
Level 5: 20 XP cost	Enemy must ID their Lieutenant during deployment +15 Army Points					

At the end of each game chapter, a player may purchase as many upgrades as they wish. Note that you must purchase all bonuses in a column in order and each bonus may only be purchased once.

At the start of each game chapter, you may then choose ONE Command Experience bonus per column to have access to during the game.

For example, a player has purchased levels 1, 2 and 3 of Military Intelligence. Before the initiative roll is made, they must declare to their opponent which of the three bonuses will be active during that game.

Notes on specific bonuses:
+1 disposable: This applies to all applicable equipment and weapons with the disposable trait throughout the game. If a Trooper is reloaded by baggage, they will reload up to the maximum including this bonus. Turrets are excluded from this bonus.

Does the enemy have x?: This is revealed before the initiative roll is made. The enemy player must then reveal IF they have that type of trooper AND how many. But what specific Troopers they have, the loadout, or any associated equipment with them remains closed information.

Copy enemy army list: This must be revealed to the Event Organiser before the game night. A copy of the enemy army list will then be sent to the player, but some information may be redacted or wrong. The player who receives the copy of the list must keep this information closed until the game is complete.

+3 BTS: Units receiving this bonus gain up to a total of 9 BTS. If a Trooper is eligible for the bonus but the bonus would take them about 9 BTS, then the bonus is not applied to that Trooper.

Trigger Sensor: Once deployment is complete, the player using this skill may place a circular template on the board completely outside the enemy DZ. They then will make a WIP 12 Sensor roll (with +6 from the sensor skill) which will reveal any camo markers or hidden deployment troopers under the marker before the first game turn. Revealed troopers remain revealed but may re-camo during their turn as usual.

+3 Success Value: This acts as a one-time bonus to a roll and applies to all dice used by the player with this bonus for that roll. For example, if a Trooper is shooting with a Combi Rifle in active phase with a success value of 15, the success value jumps to 18 for ALL dice that the Trooper rolls in that BS Attack Skill. This can be used on any roll, including WIP checks, objective checks and saving rolls.

Auto Crit: One dice may be turned to the exact modified success value for that roll. All other dice are rolled as usual.

Commander Promotion:

As your Commander becomes more experienced and capable, they gain abilities which improve their army as a whole.

To promote your Commander, roll a single D20 at the end of each game. If you achieve your Target Number or less, then your Commander is promoted to the next rank in recognition of their performance.

As standard, the *Target Number for Promotion is 2.*

The Target Number is subject to the following bonuses:

+3 if you won the game
+50% of your last game OP rounded up (if you scored 10 OP = +5, if you scored 5 OP = +3)
+1 if 75%+ of your army survived
+1 if 25% or less of the enemy survived
-1 if less than 25% of your army survived

Any Promotion Roll modifiers from the Military Intelligence are applied to your Target Number.

The Target Number is also modified by which Promotion your Commander is going for.

Level 1 – Target Number mod = 0
You may active up to two bonuses in one column of Command Experience Bonuses

Level 2 – Target Number mod = -3
You may active up to two bonuses in two columns of Command Experience Bonuses
You gain +1 to future Initiative Rolls at the start of the game

Level 3 – Target Number mod = -6
You may active up to three bonuses in two columns of Command Experience Bonuses
You gain +1 to future Initiative Rolls at the start of the game
Your Lieutenant gains Strategos Level 1 *OR* +1 Lieutenant Order

Level 4 – Target Number mod = -9
You may active up to three bonuses in three columns of Command Experience Bonuses
You gain +2 to future Initiative Rolls at the start of the game
Your Lieutenant gains Strategos Level 1 *OR* +1 Lieutenant Order

Level 5 – Target Number mod = -12

You may active up to three bonuses in four columns of Command Experience Bonuses

You gain +3 to future Initiative Rolls at the start of the game

Your Lieutenant gains Strategos Level 1 *OR* +1 Lieutenant Order

Your Army is Immune to Loss of Lieutenant and Retreat

Command Promotion & Command Experience Bonus Example:

Dave is running has had a good run in the campaign so far and has managed to unlock six Command Experience Bonuses (CEBs):

	Mobile Reserve	Logistical Support	Military Intelligence	Tech Support	Recon Intel	The Dice Gods
Level 1: 2 XP cost	+5 Army Points ✓	+1 to all disposable weapons	+3 to the Initiative Roll +3 Promotion ✓	All REMs gain +3 BTS ✓	Draw 3 Classifieds, keep 1	Reroll 1 die per game
Level 2: 5 XP cost	+10 Army Points ✓	+1 to all disposable & +1 SWC	Does the enemy have AD? +3 Promotion ✓	All HI may reroll reset rolls	Auto pass one objective roll	+3 to success value on one roll per game round
Level 3: 9 XP cost	+10 Army Points ✓	+1 CR turret placed in friendly DZ	Does the enemy have Hidden Deployment?	All Hackers gain +3 BTS	Enemy reveals Classifieds	May auto crit one roll per game round
Level 4: 14 XP cost	+15 Army Points	+1 Baggage Bot for Free	Copy enemy army list +3 Promotion	FOs may FO in ZoC without LoS	May trigger sensor 2x after deployment	May auto crit one roll per game round
Level 5: 20 XP cost	Enemy must ID their Lieutenant during deployment +15 Army Points					

He's also managed to promote his Commander to level 2.

In the next chapter, he plans to run a Moderator as his Lieutenant:

Due to his Commander's promotion, this Moderator will now be effective WIP 14 for the Initiative Roll and gain Strategos Level 1. Strategos Level 1 means that Dave may hold back two miniatures during deployment and that the Moderators Lieutenant Order is converted to a regular order in each turn.

Additionally, Dave activates up to two bonuses in two columns in his CEBs, rather than one. So, he chooses:

Mobile Reserve Level 3

Mobile Reserve Level 2

Military Intelligence Level 1

Military Intelligence Level 2

Level 1 Tech Support

This gives him:

+20 Army Points to put in his list

+3 to the Initiative Roll (making the Moderator effective WIP 17)

+6 to the Promotion Roll at the end of the game

The ability to find out how many AD Troopers the enemy has

+3 BTS on all REMs

Spec-Ops:

A Special Operation Trooper, or Spec-Ops, is a veteran unit who knows their way around the battlefield. They have gained skills, salvaged equipment, or otherwise improved themselves to be a better survivor in combat.

In game terms, a Spec-Ops is a Trooper who may be upgraded with Experience earned by the army each chapter. This XP may be used to buff their stats, weapons, skills, or equipment. This means that their capability and utility increases with each chapter, but their points remain the same.

Once an Experience Point is spent on a Spec-Ops, the update is permanent. You may not refund and spend the Experience Points again in subsequent rounds.

Spec-Ops are already built into the game and may be found at the end of the unit lists in Infinity Army. As the campaign begins, your Spec-Ops will have 3 XP.

Consumables:

Commander's may use their Experience to gain a strategic advantage through equipment, intel, or personnel. These one-time buffs will give the army a lift for the game ahead but confer no long-term buff. Additional equipment or skills does not impact the points or SWC values of any troopers they are applied to.

Any consumables purchased last only for the next Chapter, then they, and their Experience Points cost are lost. If equipment is not used in a Chapter, then that, too, is lost.

A single Trooper may have multiple Consumables.

Consumables are Open Information shared at the start of the game OR, for hidden deployment/ AD troopers, when the Trooper is deployed.

Note that each Consumable may only be purchased once per Chapter.

Reinforcements – 2XP
For the next game chapter only, the player gains 8 army points and 0.5 SWC.

Emergency Medical Supplies – 2 XP
Two S2 units with a cost less than 25 points each gain a medikit.

Emergency Tech Support – 2 XP
Two, S2 units with a cost less than 25 points each gain a gizmokit.

Emergency Ordinance Support – 4 XP
Two, S2 units with a cost less than 18 points each gain a panzerfaust.

Move Up – 4 XP
Two S2 units, with a value of 18 points each or lower gain forward deployment +8".

Defensive Measures – 4 XP
Two S2 units, with a value of 20 points or less each gain three shock OR AP mines and the minelayer skill.

Tracking Your Performance:

Each player should track their Experience Points on their Campaign Sheet. Completing the Operational Performance module to track what they have earned, and any unspent XP from previous rounds:

Operational Performance

Chapter	Mission	Opponent	OPs	Army Points Left	Total XP*
1					
2					
3					
4					
5					
6					

Unspent XP:

*OP total + 1 for a win OR +3 if both strike team members won.

From there, they should remove all entries from the Consumable section then spend their XP as they wish.

Note that Command Levels and Command Experience sections have checkboxes to denote which has been purchased.

Finally, updating the Unspent XP total on the Operational Performance section if needed.

This should be done at the end of a Chapter after your game but before the next Chapter mission or pairings are announced.

The TO will track and copy all Campaign Sheets for reference. So, if you have any questions or issues, the TO may make previous versions of your Campaign Sheet available to you.
